

When Life Turns Golden

Accordance Home Care Provides the Silver Lining

AT 93-YEARS OLD, HERMAN LIBBE'S LIFE IS GOLDEN.

"Being able to remain in his home is very important to him," says Herman's daughter Penny Patterson. "Accordance Home Care makes that possible. He dearly loves his caregiver, Amelia."

For over a year, Accordance's Amelia Gibson has nurtured a special relationship with Mr. Libbe that transcends helping maintain his home and preparing his meals. They have become friends. In fact, when the dapper Mr. Libbe takes his two walks per day, he carries his cane in one hand and Amelia on the other. Penny says, "We can't imagine having anyone else care for him."

Like many adult children of aging parents, Penny has a busy personal life, which presents challenges in her ability to offer constant attention to her father. Accordance offers Penny a solution - call it a silver lining - to that cloudy issue. "My father is not always easy to deal with. I tried other private home care companies in Huntsville and Accordance has been by far the best experience. I could not be more pleased with their dependability and professional service."

Breakthrough Technology for Window Manufacturers

SAFE-GARD® THIN COMPOSITES

SAFE-GARD® dry-laminated composite film has passed the stringent test standards of the Dade County 2 by 4 missile impact and cycling requirements of the Southern Florida Building Code. This breakthrough brings about a cost-effective way for window manufacturers to offer windows and doors that are less costly and lighter than products employing PVB laminated glass.

SAFE-GARD® can be incorporated into most window applications and IG units without affecting the integrity or durability of the seal and without adding extra weight to window sashes.

SAFE-GARD® meets ANSI Z97.1 (Unlimited) and CPSC 1201, Category II safety glazing standards and has received an NES certificate of compliance (www.nateval.org) with the provisions of the 2000 International Code Council, BOCA National, SBCCI, and ICBO Uniform Standards.

The Original Impact Resistant Composite
